Junior Frontend Software Engineer with 2+ years of experience in building and maintaining single-page applications using Angular and TypeScript. Experienced in migrating AngularJS codebases to modern Angular frameworks, creating dynamic UIs, and collaborating with cross-functional teams. Skilled in agile methodologies, writing clean and maintainable code, and contributing to educational and ERP products. Strong foundation in JavaScript, HTML5, CSS3, and modern build tools like npm and Webpack.

WORK EXPERIENCE

SDE 2 (Software Development Engineer)   **Hyderabad**
iGuru Portal Services Pvt Ltd   *April 2025 - Present*

1. Built and maintained SPAs using Angular 14+, contributing to dashboard and reporting modules for educational institutions.
2. Worked with senior engineers to implement new UI features using component libraries and SCSS.
3. Refactored and modernized legacy AngularJS modules for performance and maintainability.
4. Participated in agile ceremonies and contributed to sprint planning and peer code reviews.

SDE 1 (Software Development Engineer)   **Hyderabad**
iGuru Portal Services Pvt Ltd   *June 2024 - March 2025*

1. Developed UI features with Angular, Bootstrap, and TypeScript across school management portals.
2. Integrated REST APIs and implemented form validations, dynamic rendering, and role-based access.
3. Collaborated with UX designers and product managers to implement responsive and accessible interfaces.
4. Used npm scripts for development workflows and supported build configuration updates.

Frontend Developer   **Hyderabad**
iGuru Portal Services Pvt Ltd   *April 2023 - May 2024*

1. Worked on maintaining and updating AngularJS modules, supporting migration to Angular 10+.
2. Created reusable UI components and custom directives using TypeScript and SCSS.
3. Documented frontend implementations and contributed to improving team onboarding resources.
4. Participated in QA handoff and UAT for educational apps used across 100+ institutions.
